

Recommendation letter

To whom it may concern / To Skoltech Admissions Committee

17th July 2020

Dear Sir or Madam,

My name is Vorotnikov S.A. and I am pleased to write this letter of recommendation for Gadzhiev I.G. I was his lecturer of the course of industrial robotics during sixth semester, as well as the supervisor of his graduate bachelor's work. With this letter, I would like to recommend him for the admission in the Skoltech-Bauman MSTU network program.

Gadzhiev Islam provoked positive feedback from the graduation committee and showed very good results during my course, he really stands out for his resoluteness and creativity for his work. We have worked development of a semi-automatic engraving machine of modular type; this project was completed with valuable outcomes, including some technical proceedings, and has garnered interest not just from the educational community, but also from industrial companies.

While completing research, Islam showed that he is well organized, independent and thinks variably, what is important for an engineer and student to solve the problem.

I consider Gadzhiev Islam a good student due to:

- He consistently gets good grades, his GPA is 3.97;
- He successfully conducts research activities since 2019, especially in mechanical part of engineering;
- He did a good research job and refining it in graduate qualification work.

All mentioned above as well as his willingness to learn new things combined with his existing knowledge in robotics, engineering and information technologies makes him a very good candidate for the current program.

I recommend Gadzhiev I.G. to pursue his Master studies at Skoltech. If you wish to speak to me regarding the recommendation, please feel free to contact me via e-mail (s_vorotnikov@mail.ru) or phone (89055967184).

Thanking you for your kind consideration.

Sincerely,

Sergei Vorotnikov

Associate Professor of the Department of RK9
